Checklist for Evaluating your Technology Program

Are your technology goals and purchases aligned to the vision, mission, and goals of the school?

Do you have a system in place to evaluate progress towards goals?

Are your purchases peer-reviewed and high quality?

Does your technology program help students develop 21st century skills and abilities?

Does your technology program promote equity for traditionally disadvantaged students?

Does your program provide personalized and blended learning opportunities?

Do your teachers have the skill and ability to take advantage of the technology?

Do you provide Professional Development that is intensive, sustained, and classroom-focused?

Do you provide personalized professional development opportunities?

Do your teachers have access to a technology mentor and an IT professional?

Do you develop and empower technology-skilled teacher leaders in your district?
